

1923 South Utica Avenue  
Tulsa, Oklahoma 74104

RML is an Equal Opportunity Employer

---

The Oklahoma State Department of Health has been involved with a blood lead-screening program to identify the extent of lead poisoning in Oklahoma. To further assess the scope of the problem, the Oklahoma State Department of Health has implemented a surveillance program. RML's role in this program is to now report all blood lead test results on Oklahoma children 6 years of age and younger. The state has also requested that demographic and geographic data be submitted for normal lead results (<10mcg/dl). To meet these requirements, clients can use the following form when submitting a specimen for a lead test:

---

**STATE REQUIRED INFORMATION WHEN REQUESTING A BLOOD LEAD TEST.**

Patient Name \_\_\_\_\_

Date of Birth \_\_\_\_\_

Male or Female \_\_\_\_\_ Race \_\_\_\_\_

Address \_\_\_\_\_
