			Non-Orderable Child					
Specimen Collection: Please indicate anticoagulant therapy. Collect 6-8 Sodium Citrate 3.2% (Blue Top) tubes. Tubes must be filled to the proper level, no hemolysis. Improperly filled tubes can give erroneous results. Room Temperature whole blood specimens must be transported to lab immediately. If sending citrated plasma aliquots, they must be double spun then aliquot 1.5 ml plasma from each tube into individual plastic aliquot tubes and freeze. Do not pool aliquots - 5 to 6 individual aliquots are necessary for testing.			CPT Code: Multiple
