

MEMORANDUM

TO: Regional Medical Laboratory Women's Health Clients

FROM: Ryan Hendren, MD, Chief of Cytopathology
Cindi Starkey, MD, Laboratory Director and Chief of Molecular Pathology

DATE: July 19, 2013

SUBJECT: Pap tests and HPV results

Regional Medical Laboratory and Pathology Laboratory Associates are pleased to announce new consolidated reporting for Pap tests and HPV results starting July 29, 2013. The HPV result will no longer be reported as an addendum to the original Pap report. Instead, you will receive one consolidated report containing both the Pap results and the HPV results. We hope this integrated Pap/HPV report will simplify your result evaluation.

If you have questions or comments about the new reporting format or have other laboratory questions, please contact Dr. Ryan Hendren or Dr. Cindi Starkey at 918-744-2553. They are also available via email; Dr. Hendren at ryan.hendren@sjmc.org or Dr. Starkey at drstarkey@sjmc.org.
