MEMORANDUM

TO: RML Clients

FROM: Carol Ghere, MT (ASCP) SI, Compliance Officer

DATE: December 23, 2016

SUBJECT: 2017 CPT4 Code Changes from American Medical Association (AMA)

The American Medical Association (AMA) CPT4 code changes for 2017 will become effective on January 1, 2017. Regional Medical Laboratory will implement the following changes in CPT4 codes to comply with changes suggested by the AMA. The table below lists the code changes that might affect you.

In 2017 the drug screen codes 80300 – 80304 will be deleted and replaced with new codes. Medicare will also discontinue the corresponding HCPCS codes: G0477 – G0479. HCPCS codes G0480 – G0483 will remain in effect. The most common screening code G0479 will become 80307. A complete list of deleted and new codes will be available after January 1, 2017, in the Billing Section of our website, www.rmlonline.com. A few updates are pending final confirmation and will be published when available.

The CPT4 codes provided are based on AMA guidelines and are for informational purposes only. CPT4 coding is the sole responsibility of the billing party. Please direct any questions regarding coding to the payor being billed. If you have any other questions or need additional information, please contact Joshua Freitag, Business Office Manager at 918-403-0261 or Joshua.Freitag@simc.org.
