

## MEMORANDUM

**TO:** All Regional Medical Laboratory Clients

**FROM:** Kat Herman, MLS(ASCP)<sup>CM</sup>SM, Manager of Microbiology  
Cindi Starkey, MD, PhD, Medical Director  
Gerald C. Miller, PhD, Chief of Microbiology and Immunology

**DATE:** May 18, 2018

**SUBJECT:** Vaginosis Profile and Vaginosis Profile Swab Interpretation Update

---

In an effort to continuously improve the quality of testing offered, Regional Medical Laboratory is updating some of the interpretive comments for Vaginosis Profile (2915425) and Vaginosis Profile Swab (2915445) testing. Resources including the College of American Pathology and recent literature were consulted to ensure interpretations are aligned with current recommendations. In addition, more concise and consistent verbiage will be used for improved charting. These changes will be effective immediately.

Test pricing, interface build, and specimen requirements will not change.

If you have any questions, please contact anyone listed above at 918-744-2500.
