DATE: August 3, 2020

SUBJECT: Reporting changes to flow cytometry immunodeficiency testing

As part of Regional Medical Laboratory's and Pathology Laboratory Associates' ongoing efforts to ensure laboratory test offerings are in keeping with best practices, we are announcing a reporting change for flow cytometry immunodeficiency testing listed below with updated CPT codes. These changes will simplify and improve the delivery of results. The tests listed below will show discretely general laboratory results without the pathology interpretation, with appropriate reference ranges, as applicable. A separate pathology report will no longer be issued alongside these general laboratory values.

TEST NAME	TEST MNEUMONIC	TEST NUMBER	CPT CODE
B and T Lymphocyte Quant by Flow	B T Lymph Qnt	5582618	86355, 86360, 86359, 85048, 85004
B and T Lymphocyte Plus NK Quant by Flow	Flow ImmPheno NK	5582615	86355, 86360, 86359, 86357, 85048, 85004
CD45 RA/RO Panel (SCID)	CD45 RA/RO	3654613	86355, 86356 X2, 86359, 86357, 86360, 85048, 85004

Additional test build information was sent out on 7/6/20 Livewire notification. Please see RML Online for additional information including CPT codes, specimen information and testing schedule.
