American Board of Medical Laboratory Immunology (ABMLI)
American College of Microbiology

*WHAT:*
The ABMLI was established in 1975 to test the expertise of immunologists. Board-certified immunologists are adjudged capable to direct laboratories engaged in the practice of medical laboratory immunology.

*WHY:*
The ABMLI is a meaningful and valuable credential for anyone practicing clinical laboratory immunology in the academic world, in industry, or in government.

*WHERE:*
ABMLI certification examination is now offered online and can be taken anytime during the month of August at testing centers worldwide.
